

## ABSTRACT OF THE DISCLOSURE

A cosmetic composition is provided which includes a first amine present as a neutralized counterion salt of a C<sub>2</sub>-C<sub>40</sub> carboxylic acid other than an alpha- or beta-hydroxycarboxylic acid, and a second amine having a molecular weight of at least 100.

- 5 Use of the second amine serves to suppress any smelly odor which might arise from release of the first amine from its salt form during rub-in on a user's skin.
